

*Oak Spring Garden Library*

# NYMPHÆA.

## POLYANDRIA. MONOGYNIA.

*Nymphaea Alba.*

Water-lily. Water-cane. Caudock. Watersocks.

Found in the Mere near  
Starborough. —

July- 1815.

It extends itself by long runners which form a  
root at the end, & send up leaf-stalks in deep  
water. — The root is bulbous. — It may be propagated  
by transplanting the bulbous roots in winter. —

The roots are used in Ireland & in the Island of  
Java to dye a dark brown. — Swine eat it; Goats  
are not fond of it; Cows & Horses refuse it. —

Both the species support the *Aphis Aquaticus* &  
*Lepturus Aquaticus*. —

Nymphaea.

*Nymphaea Alba.*  
Water-lily. Water-cam. Candock.  
Water-socks. —

ERICA.

*August -*  
1822.

Erica.

*Erica cinerea.*  
Gine-leaved Heath.

# EPILOBIUM.

## OCTANDRIA. MONOGYNIA.

*Epilobium angustifolium.*

Rosebay Willow-herb. —

Found it growing at Plumptre near Manogate  
Flowers sometimes white. — August 1<sup>st</sup> 1814. —

Goats are extremely fond of it. — Cows & Sheep eat  
it. — Horses & Swine refuse it. — The *Phalæna* *Pr.*  
= *cellus* & *Spinus* *Alpenor*, are found upon it. — The  
insects of the root are eatable. — An infusion of the  
plant has an intoxicating property, & the *Hamtochet*  
= *cadales* brew a sort of ale from the pith, & from  
the ale make alegar. — The down of the seeds also  
mixed with cotton or fur has been manufactured  
into stockings & other articles of cloathing. —

Epilobium.

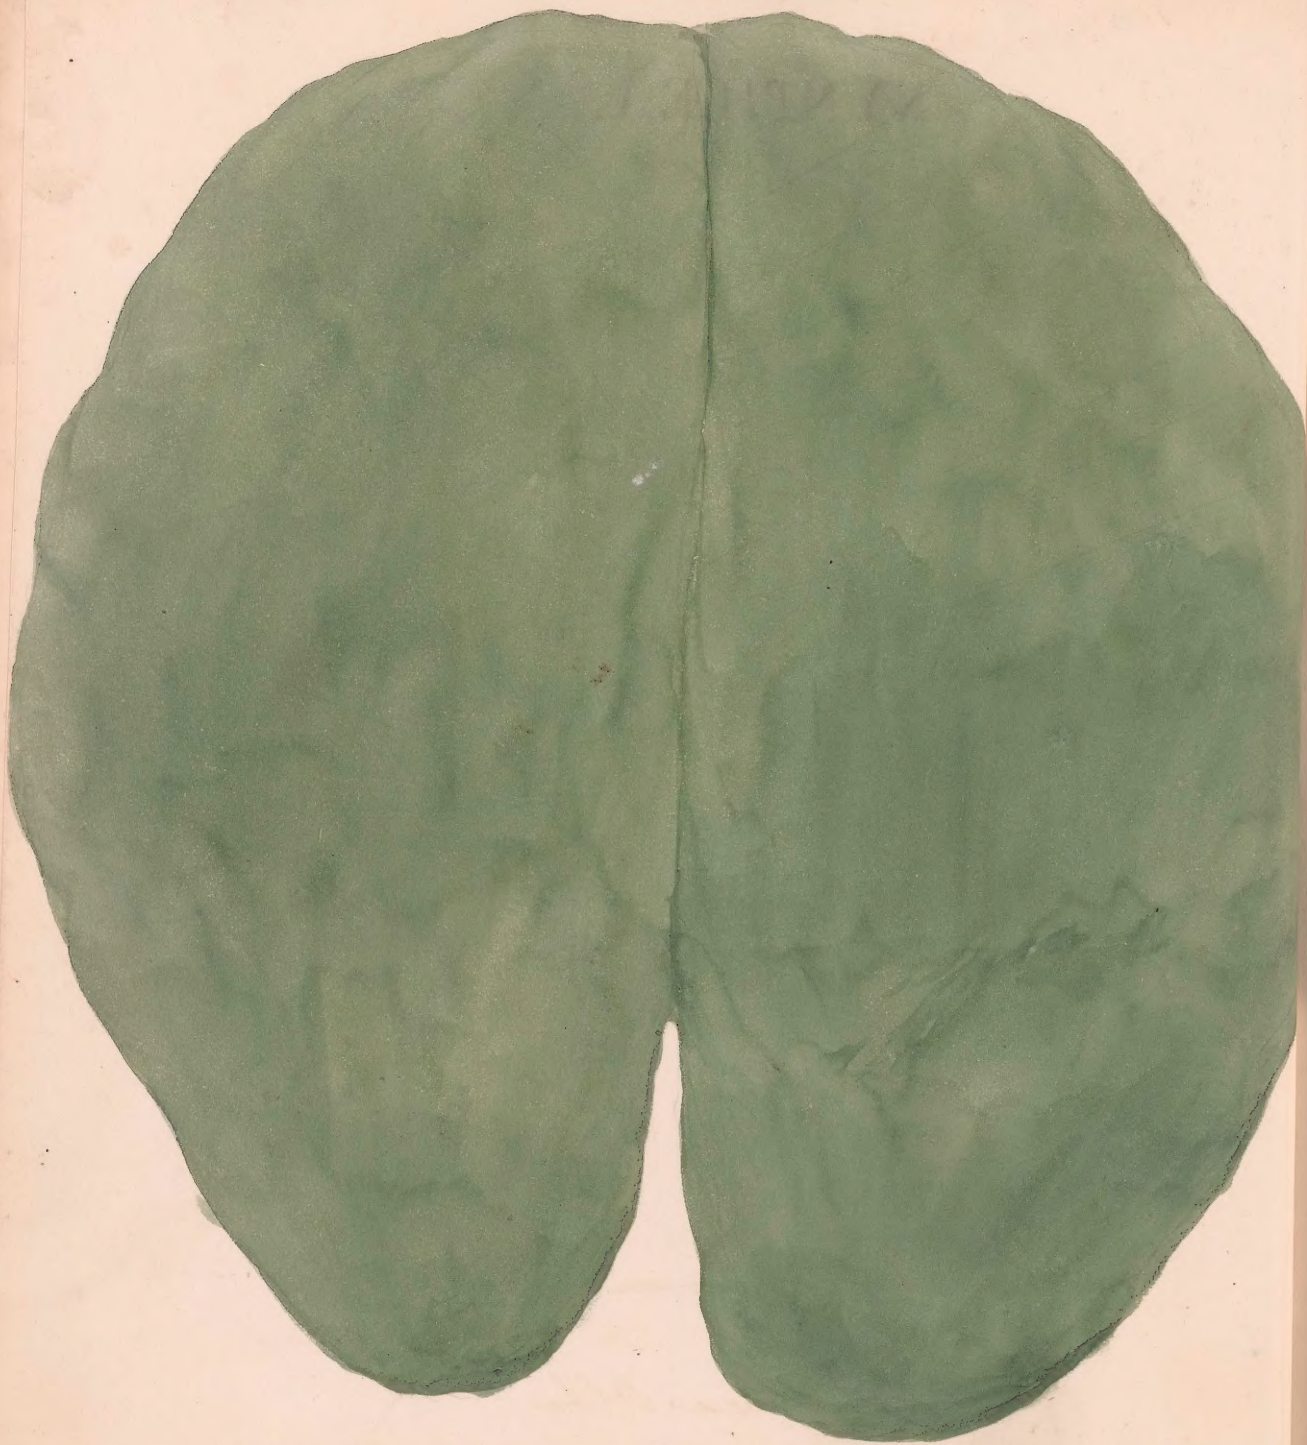

*Epilobium angustifolium*. Rosebay Willow-herb. —

1022.

# ARUM.

## POLYANDRIA. POLYGYNIA.

*Arum Maculatum*.—

Wake Robin.— Cuckow-pint.— Lords and Ladies.—

Wheat-leg.—

May.— 1810.

The berries ripen about the close of summer. Part. —  
The root & the leaves when recent, are so extremely acrid  
that it is highly disagreeable to taste them. — The root  
has been employed in medicine as a Stimulant, but  
when reduced to powder it loses much of its acrimony,  
& there is reason to suppose that the compound powder  
which takes its name from that plant, owes its virtues  
chiefly to the other ingredients. — The root, dried & powdered,  
is used by the French to wash their skin with, & is  
sold at a high price, under the name of *Cypripis Powder*. —  
When the acrimony of the roots is extracted, either by  
boiling or baking, they certainly will afford a very mild  
& wholesome nourishment. — Many nations prepare  
the only bread they have from plants as acrimonious  
as this, first dissipating the noxious qualities by the force of

64  
heat. - Starch may be made from the roots.

Arum.

*Arum Maculatum.*  
*Wake Robin. Cuckoo-pint.*  
*Lords and Ladies.*

# ANEMONE.

## POLYANDRIA. POLYGYNIA.

*Anemone nemorosa.*—

Wood. Anemone.---

*Arctostaphylos* Wood.---

April 30<sup>th</sup> 1819.---

<sup>21</sup> The Flowers fold up in a curious manner against rain. The whole plant is acrid. Goats & Sheep eat it. Horses, Cows, & Swine refuse it. The paper in which the dried specimens are preserved is stained brown, which renders it probable that it may be employed as a dye. Stokes. This plant is sometimes found with yellow dots on the under surface of the leaves, I have been mistaken for a Polypodium. Some have supposed these dots the work of an insect, but without sufficient proof. Dr. Pulteney, has rendered it probable that they are formed of a minute species of Lycopodium, though as they may be discovered in their younger state under the outer cuticle of the leaf, it is not obvious how the seeds could be introduced. These plants are evidently in a diseased state of a yellow green, & do not bear flowers. The leaf of the *Betula officinalis* is liable to be affected in the same manner.

Anemone.

*Anemone nemorosa.*

*Wood Anemone.*

RANUNCULUS.

POLYANDRIA. POLYGYNIA.

*Ranunculus Ficaria.*

Common Pilewort. *F. lefter Celandine.*

*Ficaria verna.*—

Wheatley...

March. 1817.

The young leaves may be eaten in the Spring  
along with other pot-herbs. — Goats & Sheep eat it.  
Cows & Horses refuse it. — *Curculio dorsalis*,  
is found upon it. —

Ranunculus.

*Ranunculus Ficaria.*  
Common Crowfoot. Lesser Celandine. *Ficaria verna.*

# RANUNCULUS.

## POLYANDRIA. POLYGYNIA.

*Ranunculus Flammula.*—

Lesser Spearwort.—

Found it in a Bog near Belsay Castle

in Northumberland.—

September 10 1801.—

It is very acrid. Applied externally it inflames & blisters the skin. Horses eat it. Cows, sheep, goats, & swine refuse it. Its acrimony rises in distillations. Some years ago a man travelled in several parts of England administering vomits, which, like white vitriol, operated the instant they were swallowed. The distilled water of this plant was his medicine, & from the experience I have had of it, I feel myself rather inclined to assert, that in the case of poison being swallowed, or other circumstances occurring in which it is desirable to make a patient vomit instantaneously, it is preferable to any other medicine yet known, & does not excite those painful contractions in the upper

part of the stomach which the white vitriol  
sometimes does, thereby defeating the intention  
for which it was given. —

Ranunculus.

*Ranunculus Flammula.*

*Leftes. Spearwort.*

# RANUNCULUS.

## POLYANDRIA. POLYGYNIA.

*Ranunculus Scleratus.*

Round-leaved Water Cowfoot. Celery-leaved Cowfoot.

By the side of the Lake. Westwood.

The whole plant is very corrosive; & beggars are said to use it to ulcerate their feet, which they expose in that state, to excite compassion.

Goats eat it - Cows, horses & sheep refuse it.

*Ranunculus Sceleratus.*

*Round-leaved Water Cowfoot. Cherry-leaved Cowfoot.*

# RANUNCULUS.

## POLYANDRIA. POLYGYNIA.

*Ranunculus Aquatilis.*

Water-Crowfoot.

Growing in a Pool near Wheatley.

May 1847.

So far is this plant from possessing the deleterious qualities usually attributed to it, that Dr. Pulteney, in the fifth Vol. of the Lin. Trans. has given ample testimony to its capability of almost alone supporting horses, cows, & pigs in good condition, & the animals eat it with avidity.

Ranunculus.

*Gold Cup. — Bulbous Crookfoot. —*

# FRAGARIA.

## ICOSANDRIA. POLYGYNIA.

*Fragaria Vesca.*—

*Strawberry.*—

May. — 1818.—

*Wheatley.*—

The berries, either eaten alone, or with sugar, or with milk, are universally esteemed a most delicious fruit. They are grateful, cooling, sub-acid, juicy, & have a delightful smell. — Taken in large quantities they seldom disagree. — They promote perspiration, & dissolve the tartarous incrustations upon the teeth. — People afflicted with the gout have found great relief by using them largely, & Hoffman says, he has known consumptive people cured by them. — The bark of the root is astringent. — Sheep & goats eat it. — Cows are not fond of it. — Horses & Swine refuse it. — The Cicada *Spumaria* (uckow-spit) is very frequently found upon the leaves, & the *Coccus Polonicus* upon the roots. — This has been supposed to be the common stock from which all the different sorts cultivated in gardens are.

derived, but one of the garden sorts with a very  
large berry, called the Hautbois Strawberry, bears  
male & female flowers on different plants. —

Fragaria.

*Fragaria Vesca.* —

# TEUCRIUM.

## DIDYNAMIA. GYMNOSPERMIA.

*Teucrium Scorodonia.* —

*Good Sage.* — *Sage Germanander.* —

<sup>4</sup>  
Found it in a ditch bank near Scarborough. —

July. — 1810.

The people of Jersey are said to make use of it in brewing. — It possesses the bitterness & a good deal of the flavour of hops, but upon trial it gave too much colour to the liquor. —

Teucrium.

*Teucrium scorodonia.* —

Wood Sage. Sage Gemanter. —

MENTHA.

DI DYNAMIA. GYMNOSPERMIA.

Mentha.

# GLECOMA.

## DIDYNAMIA. GYMNOSPERMIA.

*Glecoma Hederacea.*

Gill. Ground-Ivy. Cats-foot. Ale. hoof.

Two-hoof. Robin run in the hedge.

Wheatley. River Side.

May 1823.

The leaves thrown into the bath ale,  
clarify it & give it a flavour. The expressed  
juice mixed with a little wine, & applied  
morning & evening, destroys the white specks  
upon horses' eyes. The plants that grow near  
it do not flourish. Sheep eat it, horses are  
not fond of it, cows, goats, & swine refuse it.  
Little protuberances, composed of many cells, are  
sometimes found upon the leaves, & are occasioned  
by insects. The *Chalcids* *lobatix* & the *Gynips*  
*Glecomas* live upon it. Lin.

*Glechoma Hederacea.*

Gill. Ground Ivy. Lato-foot. Me-foot. Sun-foot.  
 Robin run in the hedge..

# THYMUS.

## DIDYNAMIA. GYMNOSPERMIA.

*Thymus Serpyllorum.*

Booth of Thyme. Wild Thyme.

Common Thyme.

Greenleaf. Hills.

August 1823.

This plant yields an essential oil. that is  
very heating. An infusion of the leaves removes  
the headache. The flesh of Sheep that feed  
upon aromatic plants, particularly upon Thyme,  
is much superior in flavour to common  
mutton; but Mr Bowles the author of the account  
of the Sheep walks in Spain, considers this as  
a vulgar error. he says, Sheep are not fond of  
it. Bees are fond of it. The *Phalaena*  
*papilionaria* lives upon it.

*Thymus serpyllinum.*

Mother of Thyme. Wild Thyme. Common Thyme.

# SCUTELLARIA.

## DIDYNAMIA. GYMNOSTERMIA.

*Scutellaria galericulata.*

Hooded Willowherb. Blue Skullcap.

Westwood

By the Lake at Westwood.

When the宿萼 falls off, the cap closes upon the seeds, which, when ripe, being still smaller than the cap, could not possibly open its mouth, or overcome its elastic force, as the stone does the seeds in the compound flower, & must consequently remain useless without a possibility of escaping. But nature, ever full of resources, finds a method to discharge them. The cap grows dry, & then divides into two distinct parts; so that the seeds, already detached from the receptacle, fall to the ground. Cows, goats, & sheep eat it; Hares & Rabbits eat it.

*Scutellaria Galericulata.*  
Hooked. Willows &c. Blue Skullcap.

MELAMPYRUM.

DIDYNAMIA. ANGIOSPERMIA.

*Melampyrum Sylvaticum.*

Yellow Cow-wheat.

Scammon Moor. Scarborough.

August. 1816.

Cows, Sheep, & Goats eat it, & with a  
plentiful allowance of it soon grow fat.

*Melampyrum sylvaticum.*

Yellow Swallow-tail.

# LATHRÆA.

## DIDYNAMIA. ANGIOSPERMIA.

*Lathræa Squamaria.*—

Great Toothwort.—

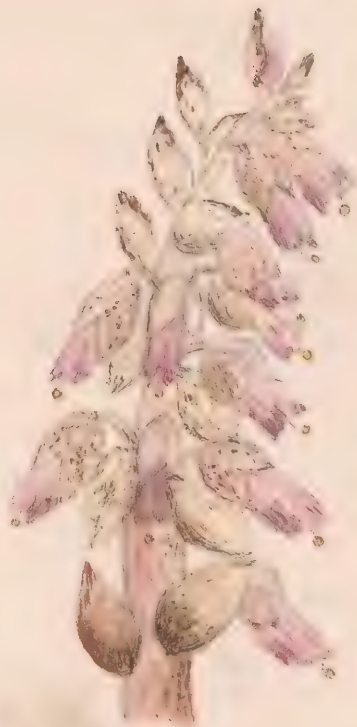

Growing at Roche Abbey  
near Malting.—

May.— 1816.

Grows only in shady places which the sun's rays  
can scarcely penetrate, it being almost destitute  
of leaves, & such plants alone can live without  
the solar light. — Scirr. — Rather Rare. —

It is also found in very light dry soil, & so  
entangled with the roots of some neighbouring  
tree, especially with those of the Hazel, that I have  
reason to believe it parasitical. W. Gough. —

Lathræa.

*Lathræa squamaria.*—

Great Toothwort.—

PEDICULARIS.

DIDYNAMIA. ANGIOSPERMIA.

*Pedicularis Palustris.*

Marsh-Anchorwort.

In a field between Anthröpe & Trammere.

June - 1815.

This is an unwelcome guest in Meadows,  
being very disagreeable to Cattle. Goats eat it.  
Horses, Sheep, & Cows refuse it. Swine are  
not fond of it. —

Pedicularis.

*Pedicularis Palustris*  
Marsh Lousewort.

PEDICULARIS.

DIDYNAMIA. ANGIOSPERMIA.

*Pedicularis Sylvatica.*

Common housewort.

Growing in the marshy part of Harrogate Common.

September 6.<sup>th</sup> 1814.

It is said that if the healthiest flock of  
sheep be fed with this plant, they become  
scabby & mucky in a short time; the wool  
will get loose; & they will be over-run with  
vermin. — Cows & hinds refuse it.

Pedicularis.

*Pedicularis Sylvatica.*

Common Housewort.

ANTIRRHINUM.

DIDYNAMIA. ANGIOSPERMIA.

*Antirrhinum cymbalaria.*

Tag-leaved Snap dragon. —

DRABA.

TETRADYNAMIA. SILICULOSA.

*Draba Perina.*—

Common Whitlow-grass.

Railway. —

Wheatley. — Walks —

April — 1810.

One of our earliest flowering plants. — It is  
good as a salad. — Goats, sheep, & horses eat  
it; cows are not fond of it, swine refuse it.

Draba.

*Draba Vera*. —

*Common Whitlow-grass. — Railwort. —*

## COCHLEARIA.

### TETRADYNAMIA. SILICULOSA.

*Cochlearia Officinalis.*

Scorvy-Grass. Scrooby-Grass. —

Found it on the Cliffs between Mill Race &  
Devon Bay near Scarborough. —

August. 1816.

Notwithstanding this is a native of the Sea Coast it  
is cultivated in gardens without any sensible alteration  
of its properties. It possesses a considerable degree of  
acrimony, & this acrimony seems to reside in a very  
subtle essential oil. — A distilled Water & a conserve are  
prepared from the leaves, & its juice is prescribed along with  
that of oranges, by the name of anti-scorbutic juices. It  
can be eaten as a salad. — Pigs eat it. Horses, Goats, &  
Sheep refuse it. —

Cochlearia.

*Cochlearia officinalis*

*Scorvy-grass. Scrooby-grass.*

# CARDAMINE.

## TETRADYNAMIA. SILIQUOSA.

*Cardamine Patensis.*...

*Common Ladies Smock.*...

*Healey - In the Grove.*...

*Mac. 1818.*...

The virtue of this flower in hysterical & epileptic cases was first mentioned by Mac, in his letter. Goats & Sheep eat it.

Horses & Swine refuse it. - I have not found of it.

Cardamine.

*Cardamine pratensis.* — Common Ladies smock.

SISYMBRIUM.  
TETRADYNAMIA. SILIQUOSA.

*Sisymbrium Nasturtium*  
Common water-cress..

*Actaea*...

June 12<sup>th</sup> 1818.

This is very universally used as an herb and  
wholesome spring salad.

Sisymbrium.

*Sisymbrium irio*  
Common water-cress.

GERANIUM.

Marsh Mallow. ....

POLYGALA.

DIADELPHIA. OCTANDRIA.

*Polygala vulgaris.*

Common. Michx. & L.

Wheatley. The Hills. —

July 10 15. —

Linnaeus found it to possess the properties of the  
Suega Rattle-snake root, (*Polygala Suega*) but in  
inferior degree. — DuRoi used it in pleuritic  
cases with the desired success. — The powdered root may  
be given in doses of half a dram — Cows, Goats, & Sheep  
eat it, & will refuse it. — An infusion of the herb,  
which is very bitter, taken in the morning fasting,  
about a quarter of a pint daily, promotes expecto-  
ration, & is good for a catarrhus cough. — I tried  
it with success. Dr. Smith. —

Polygala.

*Polygala vulgaris.*  
Common Milkwort.
